

There are many options when using labels! Consider some these:

- If you want to change what your labels say without re-making them, cut out individual *blank labels* and laminate so you can use a dry erase marker!
- Save the label document to your computer and print out a sheet any time you need a new label! For a more firm label, print on stock paper. Make it extra fun with colorful paper!
- Get together a group of friends for an organizing party!
- However you decide to use labels, be sure to make it fun!
